EDUCATION

UNIVERSIDADE DO MINHO
MASTERS SOFTWARE ENGINEERING

Sep 2021 - Current

UNIVERSIDADE DO MINHO
BACHELORS SOFTWARE ENGINEERING

Sep 2019 - Jul 2021

EXPERIENCE

EUROTUX | JUNIOR SYSTEM ADMINISTRATOR

Oct 2022 – Current

- Worked on the selection, implementation and integration of SIEM tool for better file integrity monitoring.
- Addressed security concerns for multiple clients by investigating the root cause and evaluating its merit.
- Worked on the Security team, investigating possible malicious events.
- Evaluated the security of infrastructures through vulnerability scans.

ACCENTURE | INTERSHIP

Jun 2022 – Jul 2022

- Created a monitoring tool for Microsoft Teams
- Implemented automated participation tracking and meeting summaries

SKILLS

PROGRAMMING LANGUAGES
LIBRARIES/FRAEMWORKS
TOOLS / PLATFORMS
DATABASES

C | Java | Python | Elixir | JavaScript | Bash
Express | NumPy | Scikit-learn | XGBoost | LightGBM
Linux | Ansible | Vagrant | Docker | Kubernetes | GCC
MySQL | MongoDB

PROJECTS / OPEN-SOURCE

SAFIRA | [LINK](#)

Elixir

- Worked on the implementation of a web server for the Semana de Engenharia Informatica event hosted by CeSIUM
- Used Elixir in the context of the PETAL stack for backed development.

NUMERAI TOURNAMENT PARTICIPATION | [LINK](#)

Python | Scikit-learn | XGBoost | LightGBM

- Participated in the numer.ai machine learning tournament.
- Used different machine learning models to create a diverse portfolio.

HIGH AVAILABILITY DATA SERVER | [LINK](#)

Erlang | Java | ZeroMQ

- Implemented a High availability data Key-Value store server.
- Used State-Based CRDTs to ensure efficient and fast data propagation.

SOURCE CODE ANALYSER | [LINK](#)

Python, Lex, Yacc

- Developed a code analysis tool providing insights into source code quality.
- Gathered metrics such as unreachable loops and unused variables.
- Generated System dependency and Control Flow graphs.
